Ultrasound of Abdomen and Pelvis

Report

- Liver: normal in size and echo texture, normal intrahepatic bile ducts, no sol
- GB: normal wall thickness, no stone, no SOL .
- Spleen: normal in size and echo texture, no SOL .
- Pancreas: normal visualized parts of pancreas .
- Rt. Kidney: normal in size and position and texture, normal CMD, no stone, **no hydronephrosis**, no SOL.
- Lt. Kidney: normal in size and position and texture, normal CMD, no stone, **no hydronephrosis**, no SOL.
- Partially filled urinary bladder, no stone, no SOL.
- Normal size retroverted uterus, homogeneous myometrium , empty cavity , NO SOL , ET =7 mm
- RT. Ovary volume = 38 cc with small follicles arranged peripherally and a dominant follicles measuring 17 mm , normal vascularity
- LT. ovary volume = 16 .5 cc , normal echogenicity , no SOL , normal vascularity .
- Mild pelvic free fluid is seen posterior to uterus
- RIF : no any signs of inflammation and appendix is visualized as non dilated aprestaltic tube measuring 4 mm in transvers diameter(normal) , no feature of acute appendicitis

Conclusion

Features of unilateral ovarian enlargement, mild free fluid and acute severe pain , requires a clinical correlation and to be seen by a gynecologist for suspecting ovarian torsion .

Regards,

Radiologist: Dr Ala yousif
